Education

Veermata Jijabai Technological Institute, Mumbai — **Aug. 2024 – Present**
B.Tech in Computer Engineering (Minors in Cybersecurity)| CGPA: **8.53**

Prakash College of Commerce and Science — **Aug. 2022 – May. 2024**
MHT-CET: **99.98%ile** | Rank: **62** | HSC: **87.83%** | JEE-Mains: **96.51%ile**

Relevant Coursework

- Data Structures
- Operating Systems
- Design and Analysis of Algorithms
- Computer Architecture
- DBMS
- Artificial Intelligence

Projects

AlphaAgent | *LangGraph, ChromaDB, Neo4j, SQLite, LLMs, AI Agents* — **Mar. 2026 – Apr. 2026**

- Engineered an **11-node multi-agent equity research platform** using **LangGraph**, implementing adversarial **bull/bear analyst debate** and a **JSONPath-based Evidence Auditor** to minimize hallucinations in investment analysis.
- Designed a **Hybrid RAG pipeline** combining **ChromaDB**, **Neo4j BM25**, and knowledge graph traversal via **RRF**; built an **80% deterministic ingestion pipeline** and hybrid architecture where financial metrics (**CAGR, EBITDA Margin, D/E Ratio**) were computed from **SQLite/JSON** while **Gemini 1.5 Pro** handled language synthesis.

Banquet IntelliManager | *React, Node.js, Socket.io, Twilio, JWT* — **Jan. 2026 – Mar. 2026**

- Delivered a **full-stack MERN platform** with **7 role-based dashboards** and **JWT RBAC** across **2 access layers**; **automated 100% of installment follow-ups** via **Twilio WhatsApp** reminders and webhooks for live finance tracking.
- Engineered a **Socket.io real-time system** with event-scoped rooms for GRE-to-Kitchen synchronization, reducing check-in time from **2–5 min to under 30 sec**, decreasing food waste by up to **20%**, and maintaining **sub-100ms latency**.

SmartCV – AI-Powered Resume Builder | *React, Node.js, Express, MongoDB, JWT* — **Dec. 2025 – Feb. 2026**

- Deployed a full-stack **MERN application** with **RESTful APIs**, **JWT authentication**, and real-time preview; implemented **NLP-based top-30 keyword extraction**, **5-domain skill classification**, and keyword stuffing detection.
- Architected a **6-factor ATS scoring engine** using **TF-IDF** and **cosine similarity** to evaluate resume-job compatibility and generate actionable feedback.

FakeMyVoice – Voice Cloning System | *Python, PyTorch, Deep Learning, Librosa, NumPy* — **Jul. 2025 – Sep. 2025**

- Developed a **multi-speaker voice cloning pipeline** using **Tacotron2** for text-to-mel synthesis, **WaveGlow** for high-fidelity speech generation, and a **GE2E speaker encoder** achieving **92% speaker verification accuracy**.
- Trained **single- and multi-speaker deep learning models** on **LJSpeech**, **VCTK**, and **VoxCeleb**, leveraging **Librosa** and **Torchaudio** for preprocessing, feature extraction, and speaker embedding generation.

Technical Skills

Languages: C, C++, Python, JavaScript, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, Socket.io, Twilio API, LangGraph, PyTorch, scikit-learn, NumPy, Pandas, Matplotlib, Librosa
Databases: MongoDB, MySQL, Firebase, Neo4j, ChromaDB
Developer Tools: Git, GitHub, Linux, Postman, REST API Testing, Vercel, Render, ngrok
Core Concepts: Data Structures & Algorithms, OOP, RAG, AI Agents, Multi-Agent Systems, Knowledge Graphs, WebSockets, RBAC, Webhook Integration, Cron Jobs, Competitive Programming, Agile Development, Version Control

Achievements

- Solved **800+ problems** across LeetCode, Codeforces, and CodeChef in Data Structures and Algorithms.
- LeetCode : Knight (Top **5%**) (Current Rating : **1885**, Max Rating : **1891**)
- Codeforces : Pupil (Current Rating : **1114**, Max Rating : **1204**)
- CodeChef : 2 stars (Current Rating : **1514**, Max Rating : **1514**)

Experience & Leadership

Training & Placement Representative | *Training & Placement Office, VJTI* — **Apr. 2026 – Present**

- Facilitated placement communications, assessments, and recruitment processes for a batch of **92 students**, serving as the primary liaison between the **Training & Placement Office** and the student cohort.

Deep Learning Mentee | *Project X, VJTI* — **Jul. 2025 – Present**

- Selected for a **deep learning mentorship program**; worked on a **voice cloning** model development and evaluation.

Department Coordinator | *Technovanza, VJTI* — **Oct. 2024 – Present**

- Coordinated operations for a **5000+ attendee** technical festival and conducted a hands-on **Arduino workshop**.
