Education

Veermata Jijabai Technological Institute, Mumbai — **Aug. 2024 – Present**
B.Tech in Computer Engineering | CGPA: **8.53**

Prakash College of Commerce and Science — **Aug. 2022 – May. 2024**
MHT-CET: **99.98%ile** | Rank: **62** | HSC: **87.83%** | JEE-Mains: **96.51%ile**

Relevant Coursework

- Data Structures
- Operating Systems
- Design and Analysis of Algorithms
- Computer Architecture
- DBMS
- Artificial Intelligence

Projects

SmartCV – AI-Powered Resume Builder | *React, Node.js, Express, MongoDB, Tailwind CSS, JWT* **Dec. 2025 – Feb. 2026**

- Deployed a full-stack **MERN web application** with modular **RESTful API** design and **JWT authentication**, enabling real-time resume preview with optimized API response handling.
- Built a **6-factor weighted ATS scoring engine** using **TF-IDF** and **cosine similarity** across **keywords (40%)**, **skills (20%)**, **experience (15%)**, **formatting (10%)**, **impact (10%)**, and **structure (5%)**.
- Implemented **NLP-based top-30 keyword extraction**, **5-domain skill classification**, and **keyword stuffing detection** to deliver actionable resume optimization feedback.

FakeMyVoice – Voice Cloning System | *Python, PyTorch, Deep Learning, Librosa, NumPy* **Jul. 2025 – Sep. 2025**

- Created a **multi-speaker voice cloning** pipeline using **Tacotron2** for text-to-mel synthesis and **WaveGlow** neural vocoder for high-fidelity **speech synthesis**.
- Engineered a **GE2E speaker encoder** neural network to learn discriminative speaker embeddings, achieving **92% speaker verification accuracy**.
- Trained **single- and multi-speaker deep learning models** on **LJSpeech**, **VCTK**, and **VoxCeleb** using **Librosa** and **Torchaudio** for preprocessing and feature extraction.

Image Captioning Model | *Python, PyTorch, Computer Vision, NLP, CNN, LSTM, Attention* **May. 2025 – Jun. 2025**

- Developed an end-to-end **image captioning** system using a **CNN encoder** and **LSTM decoder** trained on **MS-COCO** with **20,000+ images** and **90,000+ captions**.
- Integrated **Bahdanau attention** to improve caption relevance and visualize **word-level focus regions**, strengthening **computer vision–NLP** alignment.
- Designed a **data preprocessing pipeline** with **5K+ token vocabulary** construction; trained using **cross-entropy loss** and achieved **BLEU-1: 0.39** and **BLEU-4: 0.13**.

Technical Skills

Languages: C, C++, Python, JavaScript, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, PyTorch, TensorFlow, scikit-learn, NumPy, Pandas, Matplotlib, Librosa
Databases: MongoDB, MySQL, Firebase
Developer Tools: Git, GitHub, Linux, Postman, REST API Testing, Vercel, Render
AI/ML: Machine Learning, Deep Learning, NLP, Neural Networks, Attention Mechanisms
Core Concepts: Data Structures & Algorithms, OOP, Competitive Programming, Agile Development, Version Control

Achievements

- Solved **800+ problems** across LeetCode, Codeforces, and CodeChef in Data Structures and Algorithms.
- LeetCode : Knight (Top **5%**) (Current Rating : **1891**, Max Rating : **1891**)
- Codeforces : Pupil (Current Rating : **1114**, Max Rating : **1204**)
- CodeChef : 2 stars (Current Rating : **1500**, Max Rating : **1512**)

Experience & Leadership

Deep Learning Mentee | *Project X, VJTI* **Jul. 2025 – Present**

- Selected for a competitive **deep learning mentorship program**; contributed to **voice cloning** model via **hyperparameter tuning**, **model training**, and evaluation for **speech synthesis**.

Department Coordinator | *Technovanza, VJTI* **Oct. 2024 – Present**

- Coordinated operations for a **5000+ attendee** technical festival; led **team management** and delivered a hands-on **embedded systems** (Arduino) workshop.
